CONTENTS

Volume 39, Issues 1–8

International Journal of
MATHEMATICAL EDUCATION in SCIENCE and TECHNOLOGY

Issue No. 1, 15 JANUARY

Upper secondary students' task reasoning
T. Bergqvist, J. Lithner and L. Sumpter 1

A survey of advanced mathematics topics: a new high school mathematics class
C. Bellomo and R. Strapp 13

Enhancing *Mathematics for Informatics* and its correlation with student pass rates
B. Divjak and Z. Erjavec 23

A simple yet accurate method for students to determine asteroid rotation periods from fragmented light curve data
R.A. Beare 35

Justifying differential derivations when setting up definite integrals
K. Tarvainen 61

The evaluation of the error term in some Gauss-type formulae for the approximation of Cauchy Principal Value integrals
H.V. Smith 69

Some problems and conjectures in number theory
H.K. Pathak 77

Classroom Notes

Linear system of equations, matrix inversion, and linear programming using MS Excel
M. El-Gebeily and B. Yushau 83

On the product of rotations
G. Trenkler and D. Trenkler 94

Four proofs of the converse of the Chinese Remainder Theorem
D.E. Dobbs 104

Parseval-type relations for Laplace transform and their applications
S. Herman, J. Maceli, M. Rogala and O. Yürekli 109

Generating constant weight binary codes
D.G. Knight 115

Gamma and related functions generalized for sequences
R.L. Ollerton 124

Analysis of a game of graph solitaire
R. Hemasinha 132

Issue No. 2, 15 March

Pre-service teachers' use of different types of mathematical reasoning in paper-and-pencil versus technology-supported environments
I.O. Zembat 143

Dynamics of a definition: a framework to analyse student construction of the concept of solution to a differential equation
D. Raychaudhuri 161

An investigation into whether student use of graphics calculators matches their teacher's expectations
E. Graham, C. Headlam, J. Sharp and B. Watson 179

On MTE-model of mathematics teaching: studying the problems related to a plane division using the MTE-model
O. Bodroža-Pantić, S. Matić-Kekić, B. Jakovljev and Đ. Marković 197

Dynamic visual computer design for factors and multiples word problem learning
C. Hsieh and S. Lin 215

Classroom Notes

The sum of the squares of the first n natural numbers: two different but similar approaches, and a bonus
P. Grima and L. Marco 233

Solving second-order differential equations with variable coefficients
A. Wilmer III and G.B. Costa 238

Conversion of a rhotrix to a 'coupled matrix'
B. Sani 244

How long was the coast of Ireland? Investigating the variation of the fractal dimension of maps over time
M. McCartney, D. Myers and Y. Sun 249

Seeing around a ball: complex, technology-based problems in calculus with applications in science and engineering – redux
B. Winkel 253

Estimation of half-life for single compartmental elimination models
R.E. Mickens and S. Rucker 263

Derivation of the hypergeometric distribution: an alternative reasoning approach
D.S. Broca 269

Another formulation of Euler's formula and its application
S. Niizeki and M. Araki 274

Fourier series optimization opportunity
B. Winkel 276

Issue No. 3, 15 April

Mathematics instruction and the tablet PC
K.R. Fister and M.L. McCarthy 285

Predicting mathematical aptitude for higher education
B. McDonald 293

Comparison among different patterns of priority vectors estimation methods
S. Lipovetsky 301

Behind the scenes of pseudo-proportionality
M. Modestou, I. Elia, A. Gagatsis and G. Spanoudis 313

How does one assess the accuracy of academic success predictors? ROC analysis applied to university entrance factors
J.-M. Vivo and M. Franco 325

Computer-aided assessment questions in engineering mathematics using *MapleTA*®
I.S. Jones 341

Estimation of return values of wave height: consequences of missing observations
J. Rydén 357

Classroom Notes

Intuitive understanding of solutions of partially differential equations
Y. Kobayashi 365

Nearest neighbour: a test to see if data points attract each other, repel each other or are randomly distributed
P. Belcher 371

Alternative proofs for inequalities of some trigonometric functions
B.-N. Guo and F. Qi 384

The implicit function theorem and non-existence of limit of functions of several variables
A.L.C. dos Santos and P.N. da Silva 389

On a particular case of series
E.C. de Oliveira 394

Generalized Laplace transforms and extended Heaviside calculus
M.A.B. Deakin 400

A proof of the Collatz conjecture
P.S. Bruckman 403

The law of cosines for an n-dimensional simplex
Y. Ding 407

Systems of differential equations with skew-symmetric, orthogonal matrices
P. Glaister 410

Orthocenters of triangle on the unit hypersphere
Y.J. Ahn and J.H. Lee 419

Letters to the Editor

Letter to the Editor
G. Trenkler 423

Letter to the Editor
S. Nadarajah 425

Issue No. 4, 15 JUNE

Integrating supplementary application-based tutorials in the multivariable calculus course
I.M. Verner, S. Aroshas and A. Berman 427

If not, what yes?
B. Koichu 443

Mathematical e-learning: state of the art and experiences at the Open University of Catalonia
A. Juan, A. Huertas, C. Steegmann, C. Corcoles and C. Serrat 455

Unique factorization in cyclotomic integers of degree seven
W.E. Duckworth 473

A college lesson study in calculus, preliminary report
J. Becker, P. Ghenciu, M. Horak and H. Schroeder 491

Classroom Notes

Introducing the boundary element method with MATLAB
K.-C. Ang 505

Modelling truck camper production
G.R. Kramlich, G. Kobylski and D. Ahner 519

Identities for the Fibonacci powers
A. Chen and H. Chen 534

Out of l'Hôpital clutches: an example
J. Dobos̆ 541

Illustration of regression towards the means
K. Govindaraju and S.J. Haslett 544

Uniform continuity on unbounded intervals
R.L. Pouso 551

Computing the Moore–Penrose inverse of a matrix with a Computer Algebra System
K. Schmidt 557

Identities for generalized Fibonacci numbers: a combinatorial approach
A. Plaza and S. Falcón 563

Erratum 567

Issue No. 5, 15 JULY

Improving senior secondary school students' attitude towards mathematics through self and cooperative-instructional strategies
S.A. Ifamuyiwa and M.K. Akinsola 569

Analyticity without differentiability
E. Kirillova and K. Spindler 587

A sacred geometry of the equilateral triangle
E.P. Doolan 601

A generalization of the prime number theorem
P.S. Bruckman 631

Animating an equation: a guide to using FLASH in mathematics education
E.G. Bakhoum 637

Classroom Notes

Connecting dynamic representations of simple mathematical objects with the construction and exploration of conic sections
M. Santos-Trigo, H. Espinosa-Pérez and A. Reyes-Rodríguez 657

On the analysis and construction of the butterfly curve using *Mathematica*®
Y.H. Geum and Y.I. Kim 670

On sums of numerical series and Fourier series
H.G. Pavão and E.C. de Oliveira 679

Monotonicity and logarithmic concavity of two functions involving exponential function
A.-Q. Liu, G.-F. Li, B.-N. Guo and F. Qi 686

Student presentations in the classroom
D.L. Farnsworth 692

Latin and cross Latin squares
E. Emanouilidis 697

Issue No. 6, 15 SEPTEMBER

The effect of motion analysis activities in a video-based laboratory in students' understanding of position, velocity and frames of reference
E. Koleza and J. Pappas 701

The singing wineglass: an exercise in mathematical modelling
E.L. Voges and S.V. Joubert 725

The mean as the balance point: thought experiments with measuring sticks
A. Flores 741

Fibonacci numbers revisited: technology-motivated inquiry into a two-parametric difference equation
S. Abramovich and G.A. Leonov 749

Algorithmic contexts and learning potentiality: a case study of students' understanding of calculus
K. Pettersson and M. Scheja 767

Combinatorial proofs of Honsberger-type identities
A. Plaza and S. Falcón 785

The effects of designing Webquests on the motivation of pre-service elementary school teachers
E. Halat 793

Classroom Notes

General power sums of integers that are, and are not, represented in the two-element Frobenius problem
N. Gauthier 803

Conjectures pertaining to repeated partitioning of a triangle
A. Wares 814

Sequences with M-bonacci property and their finite sums
M.A. Asiru 819

On integer solutions of an arctan problem
P. Glaister 829

On the Dirichlet's box principle
K.-K. Poon and W.-C. Shiu 833

Book Review 839

Issue No. 7, 15 October

An evaluation of the Supplemental Instruction programme in a first year calculus course
V. Fayowski and P.D. MacMillan 843

Pre-service mathematics teachers' concept images of radian
H. Akkoc 857

The classical version of Stokes' theorem revisited
S. Markvorsen 879

Defining the problem: mathematical errors and misconceptions exhibited by first-year bioscience undergraduates
V.N. Tariq 889

A revised theorization of the relationship between teachers' conceptions of mathematics and its teaching
R. Hoz and G. Weizman 905

Teaching mathematics using Steplets
O. Bringslid and A. Norstein 925

Classroom Notes

Two identities for the Bernoulli–Euler numbers
N. Gauthier 937

On the 'independence of trials-assumption' in geometric distribution
M.F. Al-Saleh 944

Unification and infinite series
J.V. Leyendekkers and A.G. Shannon 948

Technology and x^x
W. Gratzer and S. Krishnan 952

On a general class of trigonometric functions and Fourier series
H.G. Pavão and E.C. de Oliveira 961

Using the Hill cipher to teach cryptographic principles
A. McAndrew 967

A generalization of the formula for the triangular number of the sum and product of natural numbers
M.A. Asiru 979

Issue No. 8, 15 DECEMBER

A case example of insect gymnastics: how is non-Euclidean geometry learned?
P. Junius 987

Biomathtutor: evaluation of a new multimedia e-learning resource to support mathematics in the biosciences
V.N. Tariq and V. Jackson 1003

Areas and the Fundamental Theorem of Calculus
A. Vajiac and B. Vajiac 1023

From lessons to lectures: NCEA mathematics results and first-year mathematics performance
A. James, C. Montelle and P. Williams 1037

The notion of reducing abstraction in quadratic functions
A. Eraslan 1051

Bionomic exploitation of a ratio-dependent predator–prey system
A. Maiti, B. Patra and G.P. Samanta 1061

Classroom Notes

A unified approach for solving nonlinear regular perturbation problems
S.A. Khuri 1077

Irregularly shaped space-filling truncated octahedra
J.R. Hanson 1090

A proof of the strong Goldbach conjecture
P.S. Bruckman 1102

An elementary proof of a converse mean-value theorem
R. Almeida 1110

Exponentially fitted variants of Euler's method for ODEs
V. Kanwar and S.K. Tomar 1112
